Feedback:
Fruit set:
WHY is it successful
• Original
• Uniform-- able to tell they're a family
• has potential to look realistic

HOW can it be better
• Pick another fruit besides peach that doesn't look like an apple

Elements set:
HOW can it be better
• Don't do the earth on top because it makes it look less real.. just stick with the rocks and maybe add moss or something earthy
• Add more to the wave (fish, coral, other sea life, etc)

WHY is it successful
• They are all connected through elements which is a really cool concept

Geometric Balls
HOW can it be better
• Add texture in the sections
WHY is it successful
• This idea will produce very simple yet interesting spheres
